Motivated with diverse industry experience in healthcare facilities, educational institutions, legal firms and financial institutions. Has experience with automation, coding, application design, networking and project management.

Skills

- Multiple Protocols: AD, DNS, DHCP, GPO, LAN, WAN, VPN, TCP/IP
- Cyber Security
- Windows: XP,7,8/8.1,10,11
- Microsoft Office:2003, 2010, 2013, 2016 and O365
- AutoTask, ConnectWise, IRIS,Pegasus ticketing system
- Kaseya Certified Technician
- ConnectWise Certified Administrator
- SCCM
- Pycharm,MySQL
- Ansible Orchestration
- Tableau
- Jenkins
- Bitbucket
- Agile Scrum master
- Project Delivery
- XLRelease - Digital.ai
- Software Testing
- DOS, powershell, VB, Java, python
- Windows Servers: 2008R2, 2012, 2016, 2019, 2022
- Strong communication skills
- Document Management
- Disaster Recovery: Veeam,Datto,StorageCraft and Idrive
- Sonicwall, and WatchGuard Firewall setup
- Unifi, Aerohive, and Meraki access point setup.
- Cloud VM build Automation QA
- Microsoft Azure
- Horizon-JIRA
- Tanium Patching
- Docker
- OpenShift
- Kubernetes
- Terraform
- Postman, Insomnia
- qTest
- GitHub
- Playwright

Accomplishments

- Documentation and process design controls established for Integrated automation workflows
- Multi-team project planning for platform releases
- Dashboard and assignment tracking allowing smooth transition for the team to move away from excel and into Lean Agile.
- Automation Framework Development: Developed CI/CD with Terraform IaC provisioning cutting manual creation time by 80%
- API Testing Excellence: Designed and implementation of Postman API Collection for over 500+ Endpoints
- Insomnia API Payload for qTest module and test automation

Work History

Network Engineer IV/QA Analyst , 03/21/19 - current

Bank of America\TekSystems - Charlotte, NC

- Spearheaded the design and execution of CI/CD planning, and DevSecOps strategies, enhancing project efficiency by 80%
- Leveraged expertise in UNIX/Linux, Jenkins, OpenShift, Ansible, Kubernetes, and Docker to develop robust technology solutions, ensuring seamless integration and deployment in Agile environments
- Designed and deployed advanced container orchestration systems using Docker, resulting in a 70% improvement in system scalability and reliability
- Designed and implemented various test runs to build out automated functional testing solutions with postman
- Lead the implementation of optimized controls and enhanced Quality Assurance practices to support business continuity efforts

Network Engineer/System Administrator, 07/2018-01//2019

Bytes of Knowledge - Nashville, TN

- Designed and developed automated testing suits for test plans, scenarios, scripts, and procedures.
- Used kaseya VSA to push patches after review of expected results removing 50% overhead on failures
- Identified, analyzed, and documented problems with program function, output, online screens, or content.
- Executed maintenance procedures: system upgrades, security updates and disaster recovery testing.
- Supported and set up Veeam, Datta, and IDrive backup products (Offsite replication and disaster recovery).
